

Proposal for revamped Presidents Cup Points System, for 2022 and beyond.

Objective – to reward performances across all competition disciplines.

Requires creation of four divisions based on the competitions we are already running along the lines of the table below.

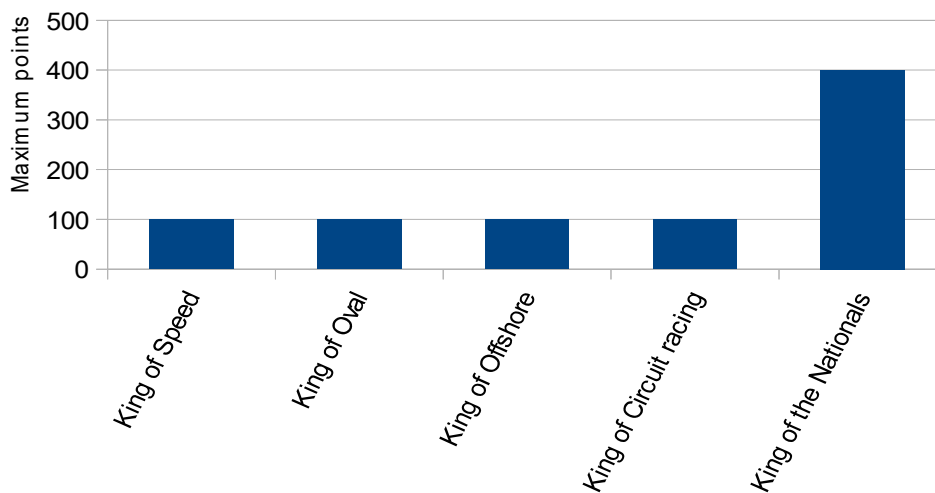

Event	Max PC points on offer to winner
King of Speed (SAW)	100
King of Oval (2 lap)	100
King of Offshore (Offshore Series as is at present)	100
King of Circuit racing (Oval Heat racing and Marathon)	100
King of the Nationals (All events at Nationals)	400
Total	800

Advantage – Neutralises the lopsided weighting on records we have at present.

Winner of each respective 'event series' carries forward the maximum points for PC total. Placegetters and below carry forward a percentage of winners points to PC total. Points will be tallied up at years end and carried forward to the next Nationals early in the following year.

The Nationals will count for 50% of the annual points available and the intention is the Presidents Cup will be awarded at the Naionals.

To win the Presidents Cup solid performances will be required across a number of but not necessarily all disciplines.

Presidents Cup Points Allocations
